Core Learning Objectives

Upon completion of this training program, a student will be able to describe how to recognize and provide treatment for choking of adults, children, and infants.

1. Demonstrate one-rescuer adult, child, and infant cardiopulmonary resuscitation on a manikin, and how to use an AED.
2. Demonstrate two-rescuer adult, child and infant cardiopulmonary resuscitation on a manikin.
3. Simulate the treatment of:
   - A conscious adult or child with an obstructed airway
   - Complications; a pregnant woman and person who is obese
4. Demonstrate the treatment of a conscious infant with an obstructed airway on a manikin.
5. Simulate the treatment of an unconscious adult, child, or infant with an obstructed airway.
6. Demonstrate the use of various breathing tools, such as masks, and bag-valve masks.
